

Let's Talk: Domestic Violence in the Church

written by Tim Jennings, M.D. | June 16, 2012

On June 16, 2012, Tim Jennings, MD, held a live webcast to present statistical data on domestic violence in the church and why it is no different than the non-church population.

Jennings explores how your view of what God's Law is affects how you treat others. Did God create, enact, and thus impose His Law upon the Universe? What does God do if such a law is broken? What do WE do if we view it the same way? Or is God's Law natural, an extension of His character and thus the template and design protocol the Universe is built to run on? What does God do if that type of law is broken? What do WE do to others if we see God and the Law this way? This presentation has the power to open your mind or to harden it.
