written by admin | December 21, 2021

Kathryn V. Camp, D.Min talks with Timothy Jennings, M.D. about how fear causes anxiety and stress and how prolonged anxiety will lead to numerous diseases, which is what makes propaganda so dangerous. The truth about situations can also cause stress, but at least a person knows how to confront adversity when they have factual data with which to work. God is the author of truth and tells us repeatedly not to fear. Recorded December 9, 2021.
